

# Automate Time Series Forecasting With AutoTS

## Application In Different Industries

### Difficulties of Time Series

- Difficult to choose model
- Several params to tune
- Need extensive data preparation

### Advantages of AutoTS

- 20**  
Has around 20 built-in models
- AUTO**  
Tune automatically
- Optimal NaN imputation and outlier removal

## Process Flow

Loading AutoTS package and preparing dataset

Initializing forecasting function and fitting the model

Selecting the best model and making prediction

## Business Cases

Predict number of trips during special events, driver incentive allocation, as well as real-time anomaly detection across millions of metrics

Do the weekly revenue forecasts at a branch/ store level, ensuring that the annual sales target can be achieved smoothly

Build demand forecasts through vehicle sales and maintenance data, reducing inventory and logistics costs caused by surplus

Analyze the viewing data and provides real time accurate bookmarks and personalized recommendations
